

G-SAFE

Traveller Security & Data Suite

Safety and security of your travellers is extremely important in today's travel environment. It has always been vital for companies to know the whereabouts of their employees, however following the introduction of the Corporate Manslaughter and Corporate Homicide Act, effective travel policy and traveller tracking are essential elements of corporate travel management.

Giles Travel is able to advise on the location of travellers at all times through **G-SAFE**, our powerful online CSR tool for Traveller Security with Data Suite functionality.

This web based application is linked to our central reservations system (Sabre) and through the use of flexible search criteria and a point and click map, Giles Travel consultants are able to locate travellers in moments.

G-SAFE is available for our corporate clients to access directly to track their travellers. With this tool you can easily locate your travellers and respond quickly in the event of an emergency or travel disruption. Query near real-time reservation data online to manage suppliers, monitor policy compliance, and more.

Easy to Use

The interactive, easy-to-use web application is available 24 hours a day, seven days a week. Upon log in, a map of where your travellers are located appears. Drill down to traveller counts by specific locale and request a summary or detailed report. You can even receive alerts when the number of travellers or executives exceeds your corporate flight threshold policy.

Valuable Data

With one simple request, search air, car, cruise, hotel and rail reservations for many data needs. Pre-trip and three years of historical data are available. Reports can be used to provide information on top O&D, group opportunities, and many other needs. Whether managing corporate travel policy compliance is the goal or negotiating a supplier deal, G-SAFE provides the information you need; at your fingertips.

Reports can be generated by Giles Travel to arrive in a specified email box detailing projected traveller movements for current and future travel dates. This can be forwarded as frequently as required – assisting travel bookers with authorization processes, and traveller tracking.

Peace of Mind

Know that whatever situation arises, you can quickly and easily locate your travellers anywhere in the world — in minutes.
